

# EU Evo Ultra

## Evaporators Cleaner

### Product Description

Evo Ultra is a formula of pure active substances that, diluted with water, creates an ultimate powerful neutral cleaner that removes even the most stubborn deposits of organic residues, grease and incrustations and descales even the most stubborn deposits of rust and salt, restoring the evaporator efficiency.

The optimal recommended dilution is 50 mL per liter of water. The supplied dispenser allows to obtain the desired quantity of cleaner with the precision that a so performing chemical product needs, without dilute the whole product in a single solution.

The extraordinary formula of these active substances allows to overcome the limits of water hardness. In fact, this product can be diluted with any type of water, including very hard ones and fo not leave any residue on the surfaces.

It is the perfect solution to remove organic residues, grease and the most stubborn incrustations, leaving a pleasant fresh scent.
